

SLIM-LINE BUILT-IN GAS FIREPLACES

SÓLAS

CONTEMPORARY FIRE

The Home of Contemporary Fire

Transform your interior with a SÓLAS Slim-Line Built-In Gas Fireplace. Our revolutionary designs allow you to create a dramatic contemporary focal point while occupying a minimum amount of your rooms' floor space.

 PROUDLY DESIGNED
& BUILT IN USA

Why SÓLAS

Our state-of-the-art designs mean that SÓLAS Slim-Line Built-In Fireplaces can be installed almost anywhere. Only 12 inches thin and with a low overall height, installation space requirements are reduced to an absolute minimum.

Innovative Design

The SÓLAS line of highly efficient contemporary fireplaces offers all of the features in demand by today's most discerning, design conscious homeowner.

Installation Flexibility

SÓLAS Slim-Line Built-In fireplaces require only 4 inches of noncombustible construction materials around the unit.

NG or LP Fuel

SÓLAS Slim-Line Built-In fireplaces can be easily converted to operate on either Natural or LP Gas.

Made With Pride In The USA

SÓLAS products are designed and manufactured at our facility in New Hampshire, USA.

Flexible Venting Options

Unparalleled venting options from incredibly short minimum venting requirements to available Power Venting, SÓLAS Slim-Line Built-In Fireplaces offer unprecedented installation flexibility.

Trim Panels

All Built-In Fireplaces can be manufactured with ½ inch black or stainless steel trim that frames the glass viewing area. Trim will allow for a sharper transition between the fireplace and the finished wall.

Porcelain Enamel

SÓLAS Fireplaces provide amazing radiant heat using the combination of reflective glass media and porcelain enamel panels. The panels provide reflective radiant heat, in addition to several layers of fire light—all of which enhance the soothing dancing flames.

Battery Operation

SÓLAS Built-In fireplaces are 110V powered, with a battery backup for power out situations.

Simple Operation

SÓLAS Fireplaces can be operated manually or Thermostatically using the hand held Remote Control (standard). An optional wall switch is also available for manual operation. Flame height can be raised or lowered to achieve the desired effect.

Safety Standards

All SÓLAS products come with an invisible, inconspicuous modern-mesh screen in compliance with the latest safety standards.

Reflective Glass Media Burner Pan

Reflective glass media is used in SÓLAS Fireplaces—ensuring they will operate with the highest efficiency possible. Glass crystals on top of the burner cast light throughout the fireplace and surrounding areas. Black and clear mixed glass media is standard; colored glass media is optional (see page 11).

RE-IMAGINE FIRE

FORTY8 SLIM-LINE BUILT-IN FIREPLACE (4 FT)

FORTY8 SEE-THRU

Built-in Gas Fireplace

This subtle 4 ft fireplace, Single-Sided or See-Thru, adds contemporary ambiance to a variety of room settings. Highly efficient while conveniently sized for homes and commercial settings, the FORTY8 is versatile for a range of architectural applications.
