## THE BENEFITS OF WALL MOUNTED VENT FREE FIREPLACES

No framing or venting required. Easy installation in showrooms and retail locations for display models. Wall Mounts do not use any floor space and can be seen better from farther away as they can be mounted at any height. With three different vent free wall mount models to choose, a SÓLAS is a premium auxiliary heat source. SÓLAS state-of-the-art designs are focal points in both contemporary and traditional interiors. A simple solution to bring warmth and ambiance to a home or business.

### EASE OF INSTALLATION

No venting required. Simply hang the unit on the wall for a simple, low-cost, effortless installation. No major renovations needed for existing construction. Ideal for new construction.

### INSTALLATION FLEXIBILITY

SÓLAS Fireplaces have been approved to mount directly on combustible surfaces. The fireplaces can be located as low as 3" from the floor or positioned perfectly to "couch height". Overall depth is just 7¾".

### SAFETY STANDARDS

SÓLAS vent free fireplaces are certified to the latest national safety standards (ANSI Z21.11.2-2011) and are built with an ODS-Oxygen Detection Safety Pilot. For added safety, our vent free units are supplied with our modern-mesh safety screen as standard.

Check the local/state codes to determine if unvented heaters are permitted at your location before installing these products. Some jurisdictions do not permit the installation of Vent Free appliances.

### SIMPLE OPERATION

SÓLAS Fireplaces can be operated manually, or thermostatically using the hand held remote control (standard). An optional wall switch is also available for manual operation. Flame height can be raised or lowered to achieve desired effect.

### BATTERY OPERATED

SÓLAS Fireplaces operate using a Mertik Maxitrol control system which runs on 4 AA batteries, so there is no need to hard wire power to the fireplace, and, in a power outage you still have heat. Normal battery life is one heating season.

### INTERCHANGEABLE FRONT

SÓLAS Fireplaces allow you to install or remove any of our fronts without use of a single tool. Surround color options include Satin Black, Steel Grey, High Gloss Black, Stainless Steel, and Combination (Stainless Steel & Satin Black). Surrounds can be updated quickly to complement new interior designs.

### OUTSTANDING RADIANT HEAT

SÓLAS Fireplaces provide amazing radiant heat using the combination of reflective glass media and porcelain enamel panels. The panels provide reflective radiant heat, in addition to several layers of fire light—all of which enhance the soothing dancing flames.

### ROBUST FIREBOX

SÓLAS Fireplaces have a limited lifetime warranty. Heavy duty 16ga. aluminized steel firebox construction withstands years of use, while providing rust protection from the corrosive nature of gas combustions.

### REFLECTIVE GLASS MEDIA & BURNER PAN

Reflective glass media is used specifically for SÓLAS Fireplaces—ensuring they will operate with the highest efficiency possible. Glass crystals on top of the burner cast light throughout the fireplace and surrounding areas. Black glass media as standard; clear and colored glass media optional.

## ABOUT SÓLAS

SÓLAS, LLC is a division of Progressive Manufacturing Inc., located in West Lebanon, NH. Founder and President Patrick Moynihan, has been involved in the hearth industry for over 30 years. For the past 15 years Progressive Manufacturing has worked with many leading companies to bring many successful gas burning products into customers' homes. SÓLAS was first introduced to the North American market in late 2007.
